Law.Ps.I9.7.

Law is a regulating force.

Regulate-To govern by rule or restricti
on.

That there is law governing the universe is evident.

Earth and water are our first witnesses

The plants and animals are our next.

The planets are our third. Chemist.

That there is a law for intelligent man is evident.Ps.I9;7

To have a law we must have a law-giver. The law-giver's ability must be as great as the law.

Is man that law-giver? No.

A perfect law is given only by a perfect law-giver.

For what purpose was the law given?

To convert a person.

How is this done? Matt.I8;I3.

(Make application of conversion.)

2.To be our teacher in life.Is.8;I9:20.

To be our judge in death.JohnI2;48"The words that I speakthe same shalljudge him in the last day."

What would result if the law should fail to regulate the planets?

What will result if we fail to be gover
governed by God's law?
